

From Repeated Breaches to Zero Compromises: The Gomez Floor Covering Story

How 7tech shut down a pattern of cyberattacks and restored operational confidence.

20 Minute Response Time

94% Client Retention Over 5 Years

98.2% Customer Satisfaction Rating

80% Same Day Ticket Resolution

Overview / Summary

Gomez Floor Covering is a general contracting company that found itself in a dangerous cycle - repeated data breaches and ransomware attacks were putting operations, productivity, and reputation at serious risk. Two previous IT providers had failed to address the problem at its root.

In October 2019, Gomez Floor Covering brought in 7tech. Within a month, the transition was complete. Since that day, there has not been a single breach.

The Solution

7tech rebuilt Gomez Floor Covering's IT environment from the ground up, addressing both immediate security vulnerabilities and the underlying system design that had left them exposed.

Zero Trust Cybersecurity Implementation: 7tech deployed a zero trust security strategy across Gomez Floor Covering's systems, eliminating the vulnerabilities that had allowed repeated breaches under previous providers and establishing a new standard of protection from day one.

Cloud Migration and Data Management: Central data and file access were moved to the cloud while accounting software was secured on dedicated hard drives at the corporate office. Daily backup devices were installed, and remote access was configured with tiered security levels across both systems.

System Redesign and Microsoft 365 Migration: 7tech eliminated the redundant remote desktop environment entirely by migrating email to Microsoft 365, giving employees direct access to the cloud services they needed and removing a significant source of inefficiency and downtime.

Business Challenge & History

For a general contracting company, reputation and operational continuity are everything. When Gomez Floor Covering's systems were compromised multiple times under previous IT providers, the consequences extended beyond technical disruption. Downtime spread across the entire company, productivity stalled, and the business was left exposed with no credible path forward.

The core problem was structural. Outdated system design had employees relaying through an unnecessary remote desktop environment just to access cloud based services, creating inefficiency on top of vulnerability. Gomez Floor Covering needed a cybersecurity focused partner who could rebuild their IT foundation from the ground up and make sure the attacks stopped for good.

The Benefits or Outcomes

Since partnering with 7tech, Gomez Floor Covering has operated without a single data breach or system compromise, a stark contrast to the repeated incidents that had plagued the business under previous providers.

Beyond security, the streamlined IT environment freed employees from unnecessary friction, delivering faster access to the tools they needed and allowing the entire company to stay focused on completing projects and protecting its standing in the general contracting space.

Going Forward

What began as an urgent response to a security crisis has grown into a stable, trusted partnership that keeps Gomez Floor Covering protected and positioned to grow without IT holding them back.

Tired of IT Providers Who Leave Your Business Vulnerable?

7tech delivers Zero Compromise Cybersecurity and the responsive support your business deserves.

"I did some research on providers. I gave them a call, and they were exceptionally responsive. I called their references, and each reference gave glowing reviews."

Robert Nocito, Operations Manager,
